EXPERIENCE

Lyft Montreal, QC
Back End Engineer(Virtual Experience) Sep 2023 — Oct 2023

- Accomplished the Back-End Engineering job simulation by taking charge of an unfinished project within the Lyft Rentals team.
- Formulated a UML class diagram to depict the revamped architecture, restructured a chaotic codebase to align with my design.
- Innovated by introducing new features through test-driven development,all while diligently conducting unit testing.

Persistent Systems Pune, MH
Software Engineer Nov 2020 — Jun 2022

- Designed and developed REST APIs, transforming monolithic components into micro-services to enhance functionality, system modularity, and software agility.
- Optimized SQL API, reducing response time by 14.8% through query enhancements and database tuning, resulting in improved user experience.
- Collaborated with team members to achieve a 71.33% boost in API response times, optimizing system efficiency and enhancing overall user satisfaction.

PROJECTS

FLIXED 2020 — On-going
Project Link: <https://github.com/nilesh1168/flixed-movie-tracker>

- A movie tracking app for user-recorded films, planned viewings, and personalized top recommendations to enhance movie experiences.
- Implemented JSON Web Token (JWT) for secure user authentication, safeguarding sensitive user data and ensuring a safe user experience.
- Leveraged the OMDB API to seamlessly collect comprehensive movie information, enriching the app's database with up-to-date and accurate data.

CMS CLOUD 2019 — 2020
Project Link: <https://github.com/nilesh1168/CMS-Cloud>

- Created a system for Admins to manage workshops and generate reports,while Participants attend and receive e-certificates.
- Led development, maintenance, and user experience support for a cloud-based app, improving workshop management and enhancing participant experience.

EXTRA-CURRICULAR ACTIVITIES

Graduate Student's Association Montreal, QC
